ABSTRACT OF THE DISCLOSURE

Data processing apparatus is disclosed for receiving
5 recognition data from a speech recognition engine and its
corresponding dictated audio data where the recognition
data includes recognised words or characters. A display
displays the recognised words or characters and the
recognised words or characters are stored as a file
10 together with the corresponding audio data. Link data
is formed to link the position of the words or characters
in the file and the position of the corresponding audio
component in the audio data. The recognised words or
characters can be processed without losing the audio
15 data.
